

**If driver for Spectrum Compact unit was installed but it is not working properly, try updating the driver manually.**

1. Connect the Spectrum Compact unit to the PC.
2. Open device manager and under section "Ports (COM & LPT)" locate the COM port corresponding to the Spectrum Compact. Right click on it and select "Update driver":

3. In the "Update Drivers" window, select the second option "Browse my computer for driver software":

4. In the next window select the second option "Let me pick from a list of available drivers on my computer":

5. Select "Have Disk":

6. Now select "Browse", locate and open the driver provided (32bit or 64bit version according to your Windows installation):

7. Select "OK" in the "Install From Disk" window.

8. Select "Next" in the "Update Drivers" window.

(If there is a "Update Driver Warning", choose "Yes".)

9. The driver should now be successfully updated.
