

SPECTRUM COMPACT

Interference Hunting Solution Kit

Interference is an ever-present concern for RF engineers and technicians. SAF Tehnika presents a highly mobile solution kit to tackle this. Spectrum Compact series comprises seven handheld spectrum analyzers spanning 10 MHz – 87 GHz frequency range. Picking specific Spectrum Compact and directional antennas corresponding to the range of interest make this solution highly flexible and cost-efficient.

SPECTRUM COMPACT

Spectrum Compact analyzers are great for interference hunting. These handheld analyzers are rugged yet light, allowing you to stay mobile while looking for the interference source. Spectrum Compact is built for effortless use both on the ground or above it:

- Instant ON
- Weights 0.57 kg / 20.11 oz
- 8 GB onboard memory
- Works perfectly with gloves
- Battery life of up to 4 hours
- In-depth analysis with free Spectrum Manager PC software

Spectrum Compact provides a classic spectrum representation for hunting a constant interfering signal. A Zero-Span mode and waterfall diagram mode is useful to detect and tackle signals that change over time.

Learn more about each of the analyzers in the [Spectrum Compact Series Leaflet](#).

THIS KIT CONTENTS:

- Selection of Spectrum Compact analyzers
- Selection of antennas with handles and brackets for analyzer
- Coaxial adapters
- Waveguide adapters
- Test cables
- Protective cases
- Tripods and mast mounts
